# Oriental Lounge

In the magical world of the Orient, the drinking of tea is inseparably linked to the smoking of aromatic tobacco through a bubbling water pipe. This is not smoking in the usual sense, but a ritual for calming all the senses.

This is why we have created a saloon for this ritual purpose - a saloon where imagination, together with the real impressions of taste, scent and sound allows you to forget the rat race and all its accompanying woes.

## SHISHA

The water pipe, a magical instrument through which you can smoke strong, intoxicatingly perfumed tobacco, steeped in honey, strawberries, apples etc.

# Seals of Tea Purity

*Customer health protection, and therefore, the issue of pesticide residues in tea are of great concern to us. As the results of the laboratory tests of some samples show, due to the pursuit of a higher yield and thus profit, too often tea planters commit violation of the principles of protection of humans and nature. In addition, due to the inconsistency in determining the permitted pesticide residue limits within individual parts of the world, tea that can be sold in the USA cannot be sold in the EU.*

*We are aware of the difficulty of this situation, when the grower is under pressure and must decide whether to use any of the available pesticides to an acceptable extent to protect the tea plants from pest infestation. But because the grower does not know where the tea will be sold, they are not able to determine the degree and quality of treatment. Thus, pesticide residues that exceed the permitted EU standard may be found in tea destined for the USA market.*

*In order to prevent this situation, we have decided to take absolutely unprecedented steps to protect the health of our customers and, moreover, to contribute to the conservation of nature, and thus to the sustainable way of growing tea.*

***These steps are:***

- 1. Test for pesticide residues and other undesirable substances for all the teas in our offer, and commit to a minimum of the higher EU standards.***
- 2. Focus on the purchase of teas from gardens that are certified as “Organic“.***

*To help our customers make an informed tea purchase, we mark the tea offered with original pictograms (purity seals) that will be published on our website. However, within this control mechanism, we may not be able to provide a specific tea because it will not meet the criteria we require. Thus, in this case we will exclude this tea from the offer.*

*At the same time, however, we must openly admit that we are not able to provide a 100% guarantee for all imported teas, because at least for part of them we have to rely on the certification sent to us by our suppliers, and in this case we cannot rule out the possibility of non-compliance.*

# Seals of Tea Purity

*Finally, it should be noted that the measures taken above have led to an increase in the cost of tea imports and a possible time delay in their imports. Our commitment to healthy teas, however, will not be reflected in an overall flat increase in sales prices and we remain committed to delivering tea to the Dobra Tea Rooms in the shortest possible time. In some cases, however, it will not be possible to avoid this impact.*

## WE WELCOME YOU TO THE DOBRA TEA-ROOM, PURVEYOR OF THE TRULY FINE TEAS.

*This registered tradename has already become a guarantee of the highest quality of the tea served on our premises or sold by weight in a range of different original boxes. This superb quality is ensured by two simple but fundamental rules:*

- the freshness of the tea is guaranteed by the Company of Tea-Devotees, which imports it directly from tea gardens all over the world,*
- the preparation, serving and sale of tea in the Dobra Tea-room is in the hands of journeymen tea-devotees who are highly knowledgeable in the science of tea and skilled in a variety of special tea techniques, tricks of the trade and mysteries.*

*Our way of serving tea is inspired by the traditions of the Orient. And as these vary so much, here is a little guide to the basic principles which the Dobra Tea-room observes:*

- unless otherwise stated, teas which are fully fermented, scented and flavoured, such as representative examples of half green and green teas are served in teapots  contain a minimum of 3-5dl.*
  - teas of more than one pouring, unless otherwise stated, are served in different teapots identified by the symbol  or  and contain a minimum of 3-5dl.*
- A solitary tea-drinker is traditionally served with a cup of the type "Gai Wan"  or with the set "Kyoto"  which holds 1.5dl. as we are pleased to recommend.*

*Repetition of a symbol indicates the number of pouring we recommend.*

# Teas with Vision

## ORIGINALS IN THE OFFER OF DOBRA TEA ROOMS

*On the pages of the Catalogue With Vision!, which we released for the 25th anniversary of the Company of Tea Devotees establishing, and which is available on the counters of Dobra Tea Rooms, we have declared our new and radical approach to tea growing, with the utmost effort to avoid chemically treated teas. However, the protection of our customers' health is not the only objective we are pursuing.*

*Thanks to the regular tea trips that we organize every spring to the areas where tea is grown, we are able to choose reliable and proven sources.*

*In addition to qualified experts and certified bio-quality gardens, we are also meeting with new tea growing processes, where the importance of sustainable farming is put above short-term profits. However, it is not only new trends that lead to the fulfillment of the Forest Friendly Farming slogan, but sometimes quite the opposite, the most primitive approaches when tea is harvested on wild trees growing directly in the jungle. We intend to support these approaches in the future by buying tea primarily from Forest Friendly Farming farmers, i.e. those who protect nature, do not burn forests and do not plant mono-cultural growths susceptible to pests and thus doomed to pesticide treatment.*

*Below is the list of our most unique teas that at the same time meet our highest criteria for purity.*

## DHARA WHITE

*Thailand*

Probably the most important tea in our offer that meets the criteria we have set for ourselves is white tea from Thailand. This tea is collected directly in the wild jungle in northern Thailand near the border with Burma. The original Wild Assamica tea plants grow directly amongst other wild vegetation, and local farmers from the mountain tribal villages collect them by working their way through the original uninterrupted biotope. This tea's appearance and taste is similar to the Chinese Bai Mu Dan. It is absolutely unique, supplied by a family-owned company from Chiang Mai, which also operates its own tea house called Monsoon Tea.

## PUER SA BANG

*Laos*

“Tea in Bamboo” – At the northern border of Laos, in the Phongsaly region, in the inaccessible mountains near the small hamlet of Ban Komaen there are gardens of tall wild tea trees. Local villagers pick the leaves in an acrobatic way from the tall tree crowns to then let them fade on bamboo plates in direct sunlight. The still damp leaves are then stuffed into bamboo stalks and dried over the fire. After drying, bamboos are cracked and the tea, the shape of which resembles a cigar, is wrapped in bast fiber.

This tea is absolutely unique. We discovered it in this area during our adventure expedition in 2016. At the World Tea Competition in Las Vegas, it won the third prize among all the green Puerh teas in 2016.

## HA GIANG – CHÉ XANH

*Vietnam*

Green Wild Boar - Green tea, hand-picked by the local Hmong and Dao tribes from the tea plants growing wild in the Ha Giang mountain region in northern Vietnam at the border with China's Yunnan. Vietnam is a typical example of a country that has its own tradition of growing tea under natural conditions, and at the same time its market is flooded with fake Taiwanese teas or teas from monocultural gardens that were planted here under the patronage and for the needs of the Soviet Union. In Dobra Tea Rooms, we tend to promote traditional farming that is friendly to wildlife. This tea is suitable for repeated infusions.

## DARJEELING FIRST FLUSH

*India*

In the harsh mountain climate of the Himalayas, in the Darjeeling area, the first Spring tea harvest takes place from March to the end of April and is called the First Flush. The tea produced from this harvest is valued particularly for its flowery aroma, but since this rapidly diminishes with weeks and months of storage, it is very important that the tea be fresh. We buy for the Dobra Tea-room on the Calcutta tea market and transport the tea by air. This means that we can guarantee the freshness of the tea in your cup. It will be on the menu only while the fresh stock lasts.
